

KocFloc

Flocculation agent A

The highly concentrated flocculation and precipitation agent based on aluminium hydroxychloride for use in industrial water treatment and waste water treatment plants. Finest dirt particles combine to large flocs and are removed from the waste water by precipitation (sedimentation in the sludge trap) and/or filtration. Not suitable for use in biological process water treatment plants.

page 1 of 1

Areas of use

Wastewater treatment plants and conventional industrial water treatment plants.

Recommendations for use

Add to the first sludge trap/sedimentation tank via dosing pump or manually pure during operation. Dosage: daily 30-60 ml per m³ of process water or in car washes 7-10 ml per car. Optimum effect in the pH value range (process water) 7 to 8.
