

KocFrei

Process water disinfection C

Chlorine-based special product for the effective elimination of odours (odour-forming, anaerobic bacteria) in industrial water treatment and waste water treatment plants. Suitable for shock treatment as well as for continuous feeding. Not suitable for introduction into biological process water treatment plants.

page 1 of 1

Areas of use

Industrial water treatment and sewage treatment plants.

Recommendations for use

Add via dosing pump or manually pure during operation. Shock treatment: 50-100 ml per m³ process water. Permanent dosage: daily 10-20 ml per m³ industrial water or in car washes 4-8 ml per car. Optimum effect in the pH-value range (process water) 7 to 7.4. Do not use in combination with KocKlar (Kkl)!
